Education

AIR UNIVERSITY — Islamabad, Pakistan

Bachelors of Science in Electrical Engineering — Sep 2018 - Aug 2022

Experince

14 DIGITAL — Birmingham, UK (Rmote)

Software Engineer — Feb 2025 - Present

- Developed and enhanced a digital care management platform using Vue.js and Bootstrap, enabling real-time caregiver monitoring, task tracking, and medication logging.
- Created responsive, modular UI components and implemented dynamic scheduling and automated assessment workflows, improving user experience and operational efficiency.
- Collaborated in agile teams to ensure scalable front-end architecture, secure role-based access, and compliance with healthcare data standards.

JMM TECHNOLOGIES — Riyad, KSA (Rmote)

Software Engineer (ReactJS) — July 2024 - Jan 2025

- Developed and maintained HRM software using ReactJS and GraphQL, improving the efficiency of employee management software
- Collaborated with cross-functional teams to integrate GraphQL APIs, reducing query response times and enhancing user experience across HRM applications.
- Implemented reusable React components and hooks for scalable front-end architecture, ensuring consistent UI/UX in HRM system

SMART FORUM — Islamabad, Pakistan (On-site)

Junior Software Engineer — Jan 2023 - July 2024

- Worked with Qualcomm development team and developed a project management tool for Qualcomm using React and Typescript ensuring cross-browser compatibility and enhanced user experience.
- Integrated RESTful APIs to connect frontend with backend, optimizing data flow and application functionality
- Implemented dynamic components and state management solutions in React to streamline user interactions and improve application performance
